DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 7-13, drawn to a pharmaceutical composition comprising an azide derivative of a drug and a suitable pharmaceutical carrier, classified in class 514, subclass 42.
 - II. Claims 14-21, drawn to a method of increasing the half-life of a drug in a subject comprising providing an azide derivative of said drug and administering said azide derivative to a subject, classified in class 514, subclass 42.
 - III. Claims 22-23, drawn to a method for ameliorating a pathological condition in a patient comprising treating the patient with a therapeutically effective azide compound, classified in class 514, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (I and II) and (I and III) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case composition of Invention I may be used to practice the invention of either Invention II or Invention III.

Art Unit: 1623

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to unrelated methods having different modes of operation.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
